2020

BSc

CGPA/Aggregate: 7

TECHNICAL SKILLS

Data Structures, OOPS, Problem Solving, Java, HTML, CSS, JavaScript

EXPERIENCE

java Enterpriser Pvt. Ltd.,Bhubaneswar
internship

February 2023 - July 2023

Project Overview: Developed the frontend of a web-based Bitcoin wallet system, providing users with a secure and user-friendly platform to store, manage, and transact with their Bitcoins. Key Contributions: Designed and implemented the user interface using HTML, CSS, and JavaScript, GIT following modern best practices and maintaining a mobile-responsive layout for various devices.

PROJECTS

imdb_clone using OMDB API

A web application that replicates the user interface and key features of the popular Internet Movie Database (IMDb) website. This project aimed to showcase my frontend development skills while integrating the Open Movie Database (OMDb) API to fetch movie data and display it on the website. Technologies and Tools: For the development of the IMDb clone and API integration, I utilized the following technologies and tools: HTML5, CSS3, and JavaScript for building the frontend user interface. Fetch API to make HTTP requests and fetch movie data from the OMDb API. Responsive web design principles using CSS media queries to optimize the website for various devices.

A Portfolio website Using HTML, CSS, JS

As part of my frontend development journey, I undertook the creation of a personal portfolio website. The website serves as a digital showcase of my skills, projects, and accomplishments, providing a comprehensive overview of my expertise and professional background. In developing the portfolio website, I employed the following technologies and tools: HTML5, CSS3, Bootstrap and JavaScript for frontend development
